

**Michigan House Oversight Committee Hearing
December 2, 2014**

Name: Jennifer Zmarzlik of Madison Heights Michigan
Email: Administration@SmartMeterUpdate.com
Web Site: www.SmartMeterUpdate.com

Documents Attached:

1. Letter to Oversight Committee
2. Deferment Letter from DTE dated May 27, 2011
3. 1st City of Madison Hts Water Meter Contract
4. 2nd City of Madison Hts Water Meter Contract
5. My FCC Filing Comments regarding Wireless Rules Proposed

Dear Honorable Members of the Oversight Committee:

I am a very strong opponent to smart meters due to health, safety and privacy as well as environmental reasons. I have created my own web site to educate the public on all the negative issues of the smart meter which I believe outweigh the positive aspects. My web site is www.SmartMeterUpdate.com.

WE ARE THE CIRCUIT in Smart Technology. Any being that is alive, humans, animals, fish, bugs and others are all being used as a conduit for smart technology. I am EMF also known as EHS sensitive. EMF/EHS sensitivity is defined as electromagnetically sensitive to frequencies in the microwave range. I am not an electrician, or engineer or doctor nor educated in the colleges of America. I do however know by a physical marker of pain in areas of my body when I am near a direct line of microwaves. My symptoms are an immediate feeling of being electrocuted, my heart begins to palpitate, my thinking becomes extremely slow and I am unable to concentrate. I struggle with these symptoms every day as smart technology is growing rapidly with no oversight from our government that protects me.

My personal history is a long standing drama. In the 1st years of my marriage starting at age 23, 1993 I was in 6 consecutive car accidents which I was not at fault. I have sustained injuries of brain damage with long term and short term memory loss. I stuttered for years sounding like a child and thinking like a child. My nervous system was short circuited from the brain damage which caused the left side of my body to be in 80-90% in paralysis. My vision and hearing abilities were stunted so much I could only take in information at a rate of about 40 to 50%. I am not giving you this information for pity. I give you this information to make you aware that nerve damage which is electrical, is one the main problems I suffer when microwaves are in direct contact or near contact with me. It has been 18 years of intense therapy to bring me to the person I am today. I have worked very hard to learn to form sentences again as I do in this speech. I have taught myself with the help from therapists and doctors to drive again, to see again, to hear again, to speak again and to live a full quality life that I can feel accomplished and strong. 3 years ago when the smart meters were put in my city I began having the memory lapses again. I have been struggling to remember my schedule and daily plans. It has gotten worse as my entire county is filled with the smart grid now and it isn't being controlled because Wi-Fi is cheaper. The most embarrassing thing I struggle with is losing my memory again. I had gained skills and abilities back that I had lost and didn't think I would get back. I have worked very hard to get to a point where I can converse with adults in a proper way and I am losing this again I am scared for myself and for everyone who does not know the consequences of this technology.

I am being forced to take a smart meter by a company who has not given the respect of honoring my doctors' medically sound opinion. DTE honored the request for about 3 years after giving me a letter of

deferment in May 2011. In March 2014, I came home and began having symptoms of nausea, a rash on my neck and convulsive vomiting. I went to bed that night thinking I must have the flu. At about 8:00 pm the following day after the meter was installed, my husband discovered it. I immediately knew this was why I was vomiting and convulsing constantly day and night. I was believing that DTE would notify me of their intention to install a meter as they stated in writing of the deferment they agreed to. They did not send a letter, they did not call, they did not ask for a follow up medical note from my doctor to verify it would be safe for me. It was snuck on my house without my permission, without notification and without consulting my physician. This meter is still on my house and I suffer from the same symptoms and I am getting worse. I am currently treating with a doctor who is monitoring my health. I cannot afford to move, and if I do they will only force an installation on my home where I move to. I do not trust DTE in any way shape or form. I followed all the procedures DTE required to keep my analog to no avail. There is no state law that mandates I have this smart meter. The M.P.S.C. gives DTE the decision making power based on evidence provided by DTE, which is a conflict of interest.

I have also included 2 contract letters from my city of Madison Heights which requires me to have the smart water meter with the radiation remote turned off. The remote being turned off on either the electric, water or smart meters does not take the danger of RF microwave radiation away from my home, it only turns off the remote chip which can always be turned on from the originating cell antennae. It is also still taking my private data from the use of my utilities. I prefer not to let anyone know when I am flushing my toilet, taking a shower or doing my dishes and with the electric and gas smart meters much, much more. DTE admits its future plans are extensive and one of those plans is to use personal data to sell for profit without my permission.

Hot dogs that are cooked in a microwave are cooked from the inside out. Every one has had the occasional 1/2 cooked hot dog, cold on the outside and hot on the inside. We are that hot dog. When we are exposed to microwaves via smart meters, cell phones, cordless phones and more, we are being cooked like the hot dog, from the inside out. This is why many are not noticing the pain EMF/EHS sensitive feel.. healthy bodies do not regulate immediate pain from the heating of our insides. EMF sensitive' like me, have inside the body issues that are sensitive to pain a lot quicker, so we are noticing there is a problem. We are the "Canary in the Coal Mine".

Sincerely and Respectfully,

Jennifer Zmarzlik

Dear Ms. Zmarzlik:

The City is in receipt of your October 7, 2011 letter and medical waiver from [REDACTED] regarding your request to have the new outside water meter transmitter removed from your home due to "extreme sensitivity to the radiowaves exposure of the new meter, therefore creating neurological symptoms for the patient..." ([REDACTED]).

You have made a similar request of DTE Energy regarding their "smart meter". DTE officials have advised the undersigned that they have deferred consideration of your request, and have not granted you a permanent waiver. The City would also be willing to defer consideration of your request and to deactivate (not uninstall) the RF meter transmitter at your location pending a re-evaluation after one year or until a decision is made by DTE regarding their meter, whichever occurs first; however, as the City no longer performs manual, walk-up water meter reading, you will be responsible for providing the City with a timely quarterly reading from your meter on or about the following dates in 2012: January 1, April 1, July 1, and October 1.

You may call in your readings to (248) 583-0845 or provide them in-person to the Finance Department at the City Hall address. Your meter register may be read simply by recording the digits from left to right, as you would look at a car odometer. Failure to provide the City with a timely reading within several days of the aforementioned reading dates will result in the re-activation of your transmitter. You must also acknowledge that the City's ability to troubleshoot any consumption or leakage issues, if and when they arise, may be hampered due to our inability to gather consumption data due to the de-activation of the transmitter.

If you are in agreement with these terms, please sign and date both originals of this letter below and return one signed original to my attention at 300 West Thirteen Mile Road, Madison Heights, MI 48071.

Sincerely,

Benjamin I. Myers
Deputy City Manager

Subject: Medical Waiver for Advanced Meter

Re:  Madison Heights, Michigan 48071

Name on Account: 

Account No: 

Dear Mr. Jamerson:

Attached please find a medical waiver from my doctor for the advanced meter that you want to install on my home.

My first instructions for delivery per DTE spokesman were incorrect, so this letter is to re-submit my medical waiver. I faxed the number 1-888-386-6955 on May 3, 2011 and this number was unknown to you, thank you for your correct instructions per our phone conversation on May 11, 2011. I also just received a phone call from Deborah Tyler as she received this fax via another department, I told her I spoke to you and am sending another fax.

I do not have the advanced meter on my house now, and I cannot use it on my house as long as I live in this home.

This letter is to certify my notification of a medical waiver. I am faxing this today and I am also sending a certified letter in the mail addressed to you.

Please contact me at 248-541-8127 for further instructions or please send me a letter at your convenience.

Thank you for your help in this matter.

Sincerely,

Jennifer Zmarzlik

Jennifer A. Zmarzlik

Madison Heights, MI 48071

Dear Ms. Zmarzlik:

The City is in receipt of your October 7, 2011 letter and medical waiver from [REDACTED] regarding your request to have the new outside water meter transmitter removed from your home due to "extreme sensitivity to the radiowaves exposure of the new meter, therefore creating neurological symptoms for the patient..." [REDACTED].

You have made a similar request of DTE Energy regarding their "smart meter". DTE officials have advised the undersigned that they have deferred consideration of your request, and have not granted you a permanent waiver. Although the issue of the City's water meter is separate and distinct from your request of DTE regarding their meter, the City would be willing to follow a similar process, deferring consideration of the water transmitter issue and deactivating (not uninstalling) the RF meter transmitter at your location pending the City's re-evaluation after one year or until a decision is made by DTE regarding their meter, whichever occurs first. Per our conversation yesterday, the final decision regarding your water meter transmitter will be made by the City, not DTE. Because the City no longer performs manual, walk-up water meter reading, the City's offer to defer consideration and deactivate the transmitter is contingent upon you assuming responsibility for providing the City with a timely quarterly reading from your meter on or about the following dates during the one-year period: October 1, January 1, April 1, and July 1.

You may call in your readings to (248) 583-0845 or provide them in-person to the Finance Department at the City Hall address. Your meter register may be read simply by recording the digits from left to right, as you would look at a car odometer. Failure to provide the City with a timely reading within several days of the aforementioned reading dates will result in the re-activation of your transmitter. You must also acknowledge that the City's ability to troubleshoot any consumption or leakage issues, if and when they arise, may be hampered due to our inability to gather consumption data due to the de-activation of the transmitter.

If you are in agreement with these terms, please sign and date both originals of this letter below and return one signed original to my attention at 300 West Thirteen Mile Road, Madison Heights, MI 48071.

Sincerely,

Benjamin I. Myers

AFFIDAVIT OF

State of Michigan]

Oakland County]

I, Jennifer Zmarzlik, attest that my statements are true to the best of my knowledge.

Comment round for ET Docket No. 03-137 and WT Docket No. 12-357.

1. My name is Jennifer Zmarzlik . I live in Madison Heights, Michigan 48071.
2. I am disabled with nerve damage.
3. I am unable to be in direct contact or near any wireless devices without extreme pain occurring.

Wireless is microwave technology and is not monitored by the FCC in its' current usage levels in the public or private sector. There are no limits or standards for the application of this technology which curb or stop business use, personal use and military use for the safety of our citizens. Any party desiring to use this technology for their own purposes is able to tap into the grid and use it for reasons good or bad. In my county the entire traffic light system is becoming a fully wireless system. The state of Michigan is planning on using this technology in every government system. What is going to happen when interference from the manufacturing plant next door or the cell phone store on the corner is bombarding the frequencies and the traffic lights are overloaded and burn out. Drivers will be paying even higher rates for the collisions occurring because the lights are erratic. The insurance companies will need a good reason to pay out the claims yet find a responsible party and that could be the government officials who decided it was cheaper to go the wireless route instead of continuing the old standard wired system. There are too many possible scenarios for lawsuits when a city, county, state or business make decisions based on a less expensive plan with wireless. Governments must be informed of the dangers of overloading the wireless system. The wireless companies are not

disclosing the safety issues although the studies have been completed by the correct sciences.

I am very concerned with the non-thermal but destructive abilities of the microwaves. I physically sense when I am near a wireless device. My skin and nervous system begins a burning sensation that does not go away until I am away from the device near me. At this point, almost all citizens use cell phones, wireless computers, and smart meter technology and there isn't any way to keep myself away from them. Cell towers are also a major concern as they are in every city and state, even the most remote areas. Cell tower antennae are found even on apartment buildings, hospitals and in any place they can sell the idea to unsuspecting customers. I can also sense the hidden antennae that are put in buildings just by the burning sensation and high pitched noises I hear with my sensitive hearing. Hidden antennae are even more of a problem as one cannot seem to find the reason for one's unusual physical feelings or cancer causes, and they are no standards for disclosure.

The specific absorption rate science that is currently used by cell phone companies is not taking into consideration many factors. First, is the test dummy they use is not an actual human being. It is a piece of plastic with fluid inside. It is not electric like a human being. It is the electric part of a living being that is affected by these frequencies. When using a cell phone your head is not heating up from direct heat but from the overloading of radiation to the electricity in the body. Cell towers also send this same radiation out for miles, 24 hours a day, every day. This radiation is hitting every human, every animal, every insect and plants. Constant pressure will cause failure at some point. Please refer to the Specific Absorption Data at the following link:

<http://www.thermoguy.com/blog/index.php?itemid=112>

I would like to refer you to O.S.H.A. Occupational Safety & Health Administration's web site and it's documentation on the safety standards for radio frequency radiation. This will directly affect all unions, government offices and the private sector. It will be an issue with Workman's Compensation in every state of the union. There will need to

be a responsible party or parties for the decisions made to use wireless instead of a wired system. City Halls are usually base stations for the police, firefighters, and all government officials as well as community centers where children play. In my state all the cities are following the same procedure and putting cell towers with an unlimited amount of cell antennae right in the center of their buildings, and may be possibly putting antennae on the opposite wall where offices are, not always on the cell tower above. And yet they are still not being informed of the harm it can do to one's body. Again, companies are not required to disclose this information even to government officials. Hospitals and office buildings are putting cell antennae on the top of the buildings they own and on the sides of the offices with no protection from the large amounts of radiation. I shudder at the thought of the lawsuits when unions discover O.S.H.A. standards are not being followed.

The link is

The American Disabilities Act is also a factor in your decision. Disabled people with nervous system disabilities, pacemakers or electronic devices in their bodies will be affected immediately by direct hits of microwave technology. Pacemakers will go offline and/or stop completely. People with nervous system problems will become unnerved and act out because they cannot think clearly. People with brain chips to help them function with prosthesis or manage cerebral palsy will be unable to stabilize the computers in their bodies. Protection for this group is essential for the stability of living optimally.

The link for the American Disabilities Act is: <http://www.ada.gov/>

These technologies are not a wired system. We become the wires, the circuit for the information to travel through. Our bodies will be overloaded with electromagnetic energy to the point of failure if there are no standards or limits put in place by the FCC.

The solution is to wire everything. Using wireless is extremely inexpensive compared to a wired system and is the reason all governments, business and personal homes are choosing to use it. Wireless is inexpensive now, however, the consequences financially of the overloading of this technology is going to be catastrophic in punitive damages.

The cancer causing agents, the accidental burning of homes, businesses, and the disabling effects of all living beings ability to function at normal levels will be hindered. The frequency interference is also an issue as there are no jurisdictional lines or laws set for this technology. Please reference a blog at this link:

which explain alternatives to wireless A wired system may cost more but according to the National Electric Code for the United States and Safety Code 6 of Canada wireless systems are unable to remain stable and there will be cause and effect scenarios as a result.

Please enact new and safe standards for all businesses, government at all levels, personal use and military for the safety of our citizens.

Respectfully submitted by

Jennifer Zmarzlik
